INTALEX

100 Mac Migrations for a Marketing Company

Mac devices don't have to mean Microsoft headaches.

The Challenge

With approximately 100 unmanaged Mac devices in offices dotted around the world, this marketing company faced significant security risks. As a company handling sensitive client data, they needed to:

- Reduce security exposure from unmanaged devices
- Meet compliance requirements for customer due diligence questionnaires
- Consolidate their fragmented technology stack using multiple vendors
- Maintain cross-platform compatibility while improving security

The fragmented approach was not only creating security gaps but also making it difficult to respond to the increasingly common customer security diligence questionnaires (often containing over 100 questions about their IT security posture).

The Intalex Solution

Intalex designed and implemented a comprehensive Microsoft Intune solution specifically configured for macOS environments. It featured:

Documentation & Support

Created comprehensive onboarding guides for self-service Mac enrollment

Provided training to enable the client's team to onboard new devices independently

Delivered ongoing 24/7 IT support through managed services

Identity & Access Management

Established single sign-on (SSO) with Microsoft 365

Integrated identity management across all applications

Streamlined login processes for improved user experience

Device Management & Security

Migrated all 100 Mac devices into Microsoft Intune

Deployed Microsoft security software and antivirus across all devices

Implemented centralised patch management and software deployment

Configured device compliance policies

INTALEX

The Results

Enhanced Security Posture

- Eliminated unmanaged device risks across the entire Mac fleet
- Centralised security controls through a single Microsoft platform
- Improved compliance capabilities for customer security questionnaires
- Reduced attack surface through consistent security policies

Operational Benefits

- Simplified vendor management by consolidating to Microsoft ecosystem
- Streamlined user experience with single sign-on capabilities
- Reduced IT complexity through unified device management
- Faster deployment of security updates and software patches

Ongoing Partnership

Intalex now provides comprehensive 24/7 IT support and managed services, ensuring the team's IT environment remains secure and optimised without requiring internal IT staff.

> **"I would wholeheartedly recommend Intalex. They have helped us scale as a business while taking the work off my own shoulders"**
>
> - **B.F., Chief of Staff**
